Experience

IndiaLends

Founder

March 2015 - Present (5 years 6 months)

Indialends is a credit underwriting and analytics platform for unsecured consumer lending. Available on both the web and mobile, IndiaLends uses proprietary algorithms to connect borrowers with the right financial institutions. Indialends also provides data analytics and risk scoring services along with a loan management platform to financial institutions. It has also helped automate workflows and risk assessments thereby making the loan disbursal process much more efficient.

IndiaLends is run by a team of bankers and data scientists with multiple years of experience in consumer and small business credit. For further information, please visit www.indialends.com
